**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1,4,6 and 8-13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rydbeck et al. in view of Rajchel.

Regarding claims 1,4,6 and 8-13, Rydbeck et al. discloses a mobile telephone (apparatus)(col. 2 lines 1-56)/method (fig. 3) for providing configurable functionality to a communication device (fig. 1), a memory for storing a plurality of software modules which provides a specific functionality to set up a communication (fig. 1 numbers 120 and 220), a host processor for receiving a command to set up a communication and for selecting one of said plurality of software models based on the type of communication desired (col. 3 lines 35-51), said digital processor for uploading (storing) one of said plurality of software modes and for executing one of said plurality of software modules (col. 3 lines 35-51). Rydbeck et al. differs

Art Unit: 2683

from claims 1,4,6 and 8-13 of the present invention in that it does not disclose a data communication module. Rajchel teaches a personal digital assistant (fig. 2) with wireless telephone functions that can select a paging (i.e. a data communication module) communication module for communication services (col. 1 lines 21-51 and col. 5 lines 20-40). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Rydbeck et al. mobile telephone with a data communication module in order for the mobile telephone to detect a paging network so that the user could page a distant friend, as taught by Rajchel.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ahmed et al. (U.S. Patent 6,690,659) discloses a radio telephone comprising a plurality of communication modules stored within its memory (fig. 2, fig. 3B and col. 9 lines 1-10).
